## Medium-term planning Summer 2

| W | Topic | Curriculum objective |
| :---: | :---: | :---: |
| 1 | Addition and subtraction of money | - To add and subtract whole numbers with more than 4 digits, including using efficient written methods (columnar addition and subtraction). <br> - To add and subtract numbers mentally with increasingly large numbers. <br> - To solve addition and subtraction multi-step problems in contexts, deciding which operations and methods to use and why. |
| 2 | Multiplication and division of money | - To multiply numbers up to 4 digits by a one- or two-digit number using an efficient written method, including long multiplication for two-digit numbers. <br> - To multiply and divide numbers mentally drawing upon known facts. <br> - To identify multiples and factors, including finding all factor pairs of a number, and common factors of two numbers. <br> - To solve problems involving multiplication and division where larger numbers are used by decomposing them into factors. <br> - To solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign. |
| 3 | Decimals and fractions | - To read, write, order and compare numbers with up to three decimal places. <br> - To read and write decimal numbers as fractions (for example, $0.71=71 / 100$ ). <br> - To recognise and use thousandths and relate them to tenths, hundredths and decimals equivalents. <br> - To round decimals with two decimal places to the nearest whole numbers and to one decimal place. |
| 4 | Problems involving percentages | - To recognise the per cent symbol (\%) and understand that per cent relates to "number of parts per hundred", and write percentages as a fraction with denominator hundred, and as a decimal fraction. <br> - To solve problems which require knowing percentage and decimal equivalents of $1 / 2,1 / 4,1 / 5,4 / 5$ and those with a denominator of a multiple of 10 or 25 . |
| 5 | Perimeter, area and scale drawing | - To measure and calculate the perimeter of composite rectilinear shapes in centimetres and metres. <br> - To calculate and compare the area of squares and rectangles including using standard units, square centimetres $\left(\mathrm{cm}^{2}\right)$ and square metres $\left(\mathrm{m}^{2}\right)$ and estimate the area of irregular shapes. <br> - To solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates. |
| 6 | Using tables, and line graphs | - To complete, read and interpret information in tables, including timetables. <br> - To solve comparison, sum and difference problems using information presented in a line graph. |
| Assess and review |  | - To assess the half-term's work. |

- To multiply and divide numbers mentally drawing upon known facts.
- To identify multiples and factors, including finding all factor pairs of a number, and

To solve problems involving multiplication and division where larger numbers are used by decomposing them into factors.

- To solve problems involving addition, subtraction, multiplication and division and a combination of these, including understanding the meaning of the equals sign.
- To read, write, order and compare numbers with up to three decimal places.
- read and write decimal numbers as fractions (for example, $0.71=1 / 100$ ). decimals equivalents.
To round decimals with two decimal places to the nearest whole numbers and to one decimal place.
To recognise the per cent symbol (\%) and understand that per cent relates to "number of parts per hundred", and write percentages as a fraction with fraction.
To solve problems which require knowing percentage and decimal equivalents of , $1 / 4,1 / 5,15$ and those with a denominator of a multiple of 10 or 25 . centimetres and metres.
To calculate and compare the area of squares and rectangles including using ( $\mathrm{cm}^{2}$ ) and square metres (m) and estimate - To solve problems involving multiplication and division, including scaling by simple fractions and problems involving simple rates.
- To assess the half-term's work.

Stukeley Federation
